

ZOHRA AHMAD

Software Engineer — Information Technology & Business Applications

Riyadh, Saudi Arabia | +966 567922539 | whyzohra@gmail.com | linkedin.com/in/zohra-ahmad | github.com/whyzohra

PROFESSIONAL SUMMARY

Software Engineer with a strong academic record (CGPA 8.8/10) and hands-on experience in backend development, cloud-native data pipelines, and business application design, built through internships at Amazon and a Saudi-based technology firm. Proficient in Python, Java, SQL, REST APIs, and AWS, with a demonstrated ability to design, implement, and maintain scalable systems and databases within Agile development environments. Seeking to contribute to Saudi Aramco's Information Technology function by developing and supporting reliable, high-quality business applications and systems in line with the objectives of Vision 2030.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, JavaScript, SQL

Backend & Distributed Systems: RESTful APIs, FastAPI, Microservices, Event-Driven Architecture, System Design, Data Structures & Algorithms

Databases: MySQL, PostgreSQL — Schema Design, Query Optimization, Indexing

Cloud & DevOps: AWS (Lambda, EventBridge, DynamoDB, Glue, CloudWatch), Docker, Kubernetes, CI/CD, Jenkins

AI Engineering & Full-Stack: OpenAI API, LLM Applications, Prompt Engineering, React, Next.js, GraphQL

Core CS & Tools: Operating Systems, Computer Networks, OOP, Software Engineering, Git, Postman, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern | Amazon — Gurugram, India

Jul 2025 – Dec 2025

- Built production-grade Java backend services on AWS processing 10,000+ daily logistics events through scalable, fault-tolerant, event-driven architectures for high-traffic distributed systems.
- Designed and implemented RESTful APIs and asynchronous microservices using AWS Lambda, Amazon EventBridge, and DynamoDB, enabling reliable, low-latency communication across distributed services.
- Built automated unit, integration, and end-to-end test suites covering 15+ production scenarios as part of a CI/CD release pipeline, applying root-cause analysis and structured logging (Amazon CloudWatch) to strengthen reliability.
- Designed and maintained scalable ETL pipelines using AWS Glue, Lambda, EventBridge, and S3 to process high-volume logistics datasets for downstream analytics.

Software Engineering Intern | 90Ways — KAEC, Saudi Arabia

Feb 2026 – Jul 2026

- Developed backend features and REST APIs in Java and Python for a production CRM system, owning functionality end-to-end across the software development lifecycle from design through deployment.
- Optimized SQL queries and relational data models against MySQL/PostgreSQL databases, reducing response latency by 30% through schema refinement, indexing, and query tuning.
- Designed and implemented relational data models and database schemas to support well-structured, maintainable backend services.
- Partnered with cross-functional stakeholders in the Saudi technology market, translating business requirements into working backend functionality within an Agile environment.

TECHNICAL PROJECTS

Atlas: AI Traffic Intelligence Platform

React, Next.js, GraphQL, Python, PyTorch, XGBoost

- Built a full-stack, cloud-ready application with a backend API layer and interactive dashboards for real-time traffic prediction via Graph Neural Networks.
- Designed and optimized a production-oriented ML inference pipeline achieving a 0.697 F1-score, emphasizing scalable, maintainable backend architecture.

MeetMind

React, Python, FastAPI, PostgreSQL, OpenAI API

- Developed a full-stack AI meeting assistant with LLM-powered conversations; built backend REST APIs, authentication, and a modular architecture for reliable deployment.

EDUCATION

Bachelor of Technology, Computer Science and Engineering

Graduated: May 2026

Indian Institute of Information Technology, Sonapat | CGPA: 8.8/10

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Distributed Systems, Cloud Computing, Database Management Systems

CERTIFICATIONS

- Oracle Database SQL Certified Associate (1Z0-071) | Google Project Management Professional Certificate

LEADERSHIP & AWARDS

- Vice President, Entrepreneurship Cell — led club initiatives supporting student entrepreneurship on campus.
- Semifinalist, Flipkart GRID 6.0 & Smart India Hackathon (AI-powered logistics solution); LeetCode Knight — 500+ problems solved.
